

EXPERIENCE

IT Support

Cat Technologies | March 2022 - October 2024 | San Luis, Argentina

- Provided level 1 and 2 technical support to clients, resolving issues related to hardware, software, and connectivity.
 - Diagnosed and resolved system operating issues, application malfunctions, and peripheral device failures both remotely and on-site.
 - Assisted users with equipment setup, software installation, and troubleshooting of technical problems.
 - Documented and escalated complex issues to higher support levels when necessary, ensuring operational continuity.
 - Maintained clear and effective communication with clients, delivering quick and accurate solutions with a focus on customer satisfaction.
-

PROJECTS

Universidad Innova

NUCBA | September 2024 - October 2024

- Developed a fully functional web page for a university offering online courses using JavaScript.
- Implemented a shopping cart feature allowing users to add courses, ensuring an interactive and efficient user experience.

Home Burger Bar

NUCBA | July 2024 - September 2024

- Created an ecommerce platform for a hamburger restaurant using CSS for styling, React, and JavaScript for the application logic.
- Utilized React Router and Redux Toolkit for route and state management, ensuring responsive design across devices.
- Integrated NucbaApi for product management and EmailJS for email delivery, achieving full functionality.

Margarita

NUCBA | June 2024 - July 2024

- Developed an ecommerce platform for a bakery using HTML and CSS, ensuring 100% responsive design for optimal user experience.
 - Designed smooth navigation and attractive product presentation
-
